

JÈM KI AP VIV SOU PO A.

KI KOTE RISK LA YE?

Nou dwe konnen ki kote jèm yo ap viv pou kanpe l epi pwoteje pasyan yo

Jèm yo kapab pwopaje lè w touche yo.

- Gen anpil jèm ki devlope sou po ki an sante.
- Nou kapab jwenn jèm ki sou po a sou sifas yo, sou lòt moun, ak sou bagay lòt moun manyen.
- Po a – espesyalman men yo – pote anpil jèm epi yo kapab pwopaje byen fasil.
- Lè nou touche yon sifas ak men nou, jèm yo kapab pwopaje, epi li soti nan sifas sa yo apati moun nan ak lòt moun.

Jèm ki pwopaje lè nou kontounen oswa lè nou pèse defans òganis lan.

- Tach swen sante yo souvan enplike pou pèse po a.
- Nou kapab pèse po a – lè nou mete yon entranèz, lè nou pran san, fè operasyon oswa lè gen yon twomatis – nou kreye yon wout pou jèm nan pwopaje nan kò a.

JÈM K ap Viv sou Po a

- *Staphylococcus aureus* (stafilokòk li gen ladan l MRSA)
- *Streptokòp* (strep)
- *Candida* (li gen ladan l *C. auris*)

Tach Swen Sante ki Enplike San

- Nenpòt bagay ki mande pou touche l
- Piki Zegwi
- Operasyon

Mezi pou Kontwòl Enfeksyon pou Diminye Risk yo

- Ijyèn men
- Itilize gan ki apwopriye
- Sekirite nan enjeksyon
- Netwayaj ak dezenfeksyon
- Kontwòl sous (kouvri kote ki blese yo ak maleng yo)
